Can AI Help Manufacturers Maintain High Quality Amid Uncertainty?

Drishti's focus on enhancing employee capabilities is a fresh take on technological solutions

We are a full two years into post-pandemic manufacturing life, with the omicron variant the latest cause for concern. It might sound hyperbolic, but I'm pretty sure manufacturing will never be the same as it was in 2019. In some ways, that's a good thing.

One silver lining of the novel coronavirus was the adaptability that it forced on many manufacturers. For all the disaster planning and preparedness exercises companies practice, there's nothing like a true crisis to test the system and show the gaps in it.

But pandemics aren't the only hurdles on the manufacturing horizon. We know that natural disasters are increasing in frequency. Supply chain disruptions and political upheaval are also growing concerns around the globe. In a recent [Drishti survey](#), we found that 60 percent of the 400 manufacturers that responded believed a significant disruptive incident would likely occur during the next 12 months.

With that level of uncertainty plaguing the industry, the question has to be asked: How do manufacturers continue to deliver high-quality products when they're sure to be impacted by happenings outside of their control?

Quality Digest does not charge readers for its content. We believe that industry news is important for you to do your job, and *Quality Digest* supports businesses of all types.

However, someone has to pay for this content. And that's where advertising comes in. Most people consider ads a nuisance, but they do serve a useful function besides allowing media companies to stay afloat. They keep you aware of new products and services relevant to your industry. All ads in *Quality Digest* apply directly to products and services that most of our readers need. You won't see automobile or health supplement ads.

Our PROMISE: *Quality Digest* only displays static ads that never overlay or cover up content. They never get in your way. They are there for you to read, or not.

So please consider turning off your ad blocker for our site.

Thanks,
Quality Digest
